Preface vii

1. Real Finsler geometry

1.0 *Introduction* 1

1.1 *Non linear connections* 3
- 1.1.1 Preliminaries 3
- 1.1.2 Horizontal and vertical bundles 5
- 1.1.3 Local coordinates 11
- 1.1.4 Geodesics 14

1.2 *Vertical connections* 15
- 1.2.1 Definitions 15
- 1.2.2 Change of coordinates 17
- 1.2.3 Linear connections on $\tilde{M}$ 18

1.3 *Torsion and curvature* 19
- 1.3.1 Connections and differentials on tensor bundles 19
- 1.3.2 The torsion 21
- 1.3.3 The curvature 22

1.4 *The Cartan connection* 24
- 1.4.1 Finsler metrics 24
- 1.4.2 The Cartan connection 26
- 1.4.3 The horizontal flag curvature 30

1.5 *First and second variations* 32
- 1.5.1 The setting 32
- 1.5.2 The first variation of the length integral 36
- 1.5.3 The second variation of the length integral 38

1.6 *The exponential map* 39
- 1.6.1 Parallel transport 39
- 1.6.2 Geodesics 40
- 1.6.3 The Gauss lemma 45
- 1.6.4 Geodesics are locally minimizing 46

1.6 *Jacobi fields and Auslander's theorems* 51
- 1.7.1 Jacobi fields 51
- 1.7.2 The Morse index form 55
- 1.7.3 The Cartan-Hadamard and Bonnet theorems 59

2. Complex Finsler geometry

2.0 *Introduction* 63

2.1 *Complex non-linear connections* 64
- 2.1.1 Preliminaries 64
- 2.1.2 Change of coordinates 67
- 2.1.3 Horizontal and vertical bundles 68
- 2.1.4 Local coordinates 74

2.2 *Complex vertical connections* 76
2.2.1 Definitions 76
2.2.2 Good vertical connections 77
2.2.3 Connections on complex tensor bundles 79
2.2.4 The torsions 80
2.2.5 The curvature 81
2.3 *The Chern-Finsler connection* 84
2.3.1 Complex Finsler metrics 84
2.3.2 The Chern-Finsler connection 87
2.3.3 Some computations 89
2.3.4 Torsions and curvatures 92
2.3.5 Kähler Finsler metrics 93
2.4 *Variations of the length integral* 96
2.4.1 The setting 96
2.4.2 The first variation formula 99
2.4.3 The second variation formula 102
2.5 *Holomorphic curvature* 105
2.5.1 Symmetry properties of the horizontal curvature 105
2.5.2 The holomorphic curvature 108
2.6 *The Cartan connection vs. the Chern-Finsler connection* 111
2.6.1 The radial vector fields 111
2.6.2 The horizontal bundles 115
2.6.3 The covariant derivatives 119
2.6.4 The horizontal curvatures 123

3. Manifolds with constant holomorphic curvature

3.0 *Introduction* 127
3.1 *Geodesic complex curves* 128
3.1.1 Definitions and properties 128
3.1.2 The existence theorem 133
3.1.3 A characterization of the Kobayashi metric 142
3.2 *Manifolds with constant nonpositive holomorphic curvature* 147
3.2.1 A complex Cartan-Hadamard theorem 147
3.2.2 The Monge-Ampère exhaustion 154
3.3 *Characterization of $\mathbb{C}^n$ and of convex circular domains* 161
3.3.1 Geometry of the Monge-Ampère foliation 161
3.3.2 A characterization of $\mathbb{C}^n$ 166
3.3.3 A characterization of convex circular domains 167
